IDEAYA Highlights

Breakthrough Science on transformative programs in Synthetic Lethality – an emerging area of precision medicine

Broad Pipeline of potential *first-in-class* precision medicine oncology programs with defined patient biomarkers

Proven Management Team with deep business and scientific experience has built leading oncology companies

Pharma Strategic Partnerships with GlaxoSmithKline¹, including ~\$3 billion in potential cash milestones, and Pfizer²

Strong Balance Sheet of ~\$346 million³ with capital efficient model, anticipated to fund operations into 2025

Analyst Coverage by JP Morgan, Guggenheim, Jefferies, Oppenheimer, Northland, Roth Capital Partners, RW Baird, Stifel and Wedbush

(1) GSK Collaboration, Option and License Agreement ; (2) Pfizer Clinical Trial Collaboration and Supply Agreements; (3) Includes cash, equivalents and marketable securities as of March 31, 2022, pursuant to Form 10-Q filed May 10, 2022

IDEAYA Biosciences – Fact Sheet

Founded 2015 on the thesis that Synthetic Lethality would emerge as a central focus of precision medicine oncology, with significant Pharma interest and the potential to develop *first-in-class* therapeutics for biomarker-defined cancer patient populations.

Broad Pipeline of clinical and preclinical precision medicine oncology programs with defined patient biomarkers, including

- *IDE397* targeting *MAT2A* for patients having tumors with *MTAP* deletion, a population estimated to represent ~ 15% of all solid tumors,
- *Pol Theta* for patients with tumors having mutations in *BRCA* or other homologous recombination deficiency (HRD),
- *PARG* for patients having tumors with HRD mutations or other genetic and/or molecular signatures,
- *Werner Helicase* for patients having tumors with high microsatellite instability,
- *MTAP-SL* and DNA Damage Targets (*DDT1*, *DDT2*), undisclosed synthetic lethality targets for molecularly-defined patient populations, and
- *Darovasertib (IDE196)* targeting *PKC* for patients having *GNAQ* /*GNA11* mutations, including metastatic uveal melanoma (MUM) or skin melanoma.

Proven Management Team with deep business and scientific experience has built leading oncology biotech companies, led by CEO Yujiro S. Hata, M.B.A., an entrepreneur with over 20 years of experience building companies that have delivered innovative therapies to patients.

Scientific Advisory Board includes world-class scientists who are key opinion leaders in precision medicine oncology and synthetic lethality, including SAB Chair Frank McCormick, Ph.D. (UCSF), and Bill Sellers, M.D. (Broad Institute, Novartis).

Pharma Strategic Partnerships and Collaborations with GlaxoSmithKline¹ and Pfizer². The GSK strategic partnership validates IDEAYA's Synthetic Lethality platform and enhances the companies' collective leadership in Synthetic Lethality. IDEAYA and GSK are collaborating on three programs – *MAT2A*, *Pol Theta* and *Werner Helicase*. IDEAYA retains commercial rights of 50% US profit-share and ex-US royalties for *MAT2A* and *Werner Helicase*, and worldwide royalties for *Pol Theta*, with potential to earn up to approximately \$3 billion in aggregate cash milestones across the three programs.

Strong Balance Sheet of ~\$346 million³, with a capital efficient model, is anticipated to fund planned operations into 2025, supporting clinical data milestones across multiple programs, including for *IDE397* – targeting *MAT2A* in *MTAP*-deletion tumors and for darovasertib – targeting *PKC* in Metastatic Uveal Melanoma (MUM) and other *GNAQ*/*11* mutation tumors, such as skin melanoma

Analyst Coverage by JP Morgan, Guggenheim, Jefferies, Oppenheimer, Northland, Roth, RW Baird, Stifel and Wedbush.
